Professional Summary

Full Stack Developer and Software Engineering & Embedded Systems undergraduate with hands-on experience building web applications, enterprise software, and user-centered digital products. Skilled in React, TypeScript, JavaScript, Node.js, and UX/UI design, with growing expertise in Flutter and mobile development. Passionate about creating scalable, accessible solutions that simplify everyday tasks, support healthier lifestyles, and improve how people interact with technology.

Professional Experience

King Global Cargo (KGC) **Jun 2025 – Present**

IT & Software Development Intern *Querétaro, Mexico*

- Develop internal web applications and enterprise interfaces using JavaScript, TypeScript, Vue, and ERPNext/Frappe to support logistics workflows.
- Contribute to ERP customization, pricing workflows, and business process digitalization, collaborating with operational and commercial teams.
- Support IT infrastructure, Microsoft 365 administration, technical documentation, and Windows/Linux environments.

Impulsa+ **Jan 2026 – Present**

Software Developer – Web & Mobile Solutions *Mexico*

- Develop responsive websites and client-facing digital solutions using React, JavaScript, Vite, and modern frontend development practices.
- Implement UX/UI improvements and website integrations with Odoo and Shopify for business clients.
- Collaborate on web and mobile application projects, translating client requirements into maintainable software solutions.

Selected Projects

LiftIA – AI-Assisted Fitness Application *(Flutter, Dart, Firebase, Figma)* 2026 – Present

- Designed and validated the UX/UI prototype for a fitness application focused on personalized training; currently developing the Android app and planning computer vision-based posture analysis.

GymFinder *(React, Vite, Google Maps API, Places API)* GitHub

- Built a gym discovery web application integrating Google Maps and Places APIs for location-based searches and facility information.

XVR – Industrial Technology Website *(React, Vite, CSS, Odoo)* GitHub

- Developed a responsive corporate website for industrial laser solutions and supported its integration with the Odoo platform.

New Pig Mexico – E-commerce Redesign *(Shopify, JavaScript, CSS)* Website

- Improved an industrial e-commerce website through frontend customization, visual hierarchy, and product discovery enhancements.
